Job Summary

The individual in this position will be responsible for all tasks related to the assembly, fabrication, delivery, and development of Atom-Jet Hydraulic Kits. The Hydraulic Specialist is responsible for meeting customer deadlines and ensuring adequate stock levels are maintained. This individual must also effectively communicate with the Territory Managers to troubleshoot operating issues, assist with technical details, identify new product, and ensure overall customer satisfaction.

Duties and responsibilities

- Assemble Hydraulic Kits.
- Ensure stock levels are maintained.
- Manage vendors and identify secondary vendors, as necessary.
- Use ERP system to manage hydraulic bills of material, purchasing, and orders.
- Work with sales and R&D to develop new products and innovate existing products.
- Troubleshoot hydraulic issues – occasional travel will be required for troubleshooting.
- Develop installation manuals.

Requirements

Experience – 3-5 years' experience in mechanics and hydraulics.

Education – Formal mechanical training or education would be an asset but is not required.

Skills – Applicant must provide exceptional customer service, multi-task, set priorities within tight timelines, and possess strong organizational skills. The individual taking this role must also be familiar with Microsoft Office, ERP/MRP systems.

Attributes – The ideal applicant will be self-directed, solution oriented, customer focused, and sales driven. This position also requires strong communication & interpersonal skills, and a focus on ongoing improvements.
