## Product Development Technician

**ATOM-JET INDUSTRIES** is a custom machining and advanced manufacturing company in Brandon, Manitoba. Atom-Jet has been in business since 1962 proudly celebrating our 60<sup>th</sup> year in business.

The Atom-Jet Group has a reputation for producing quality products and recently received the Manitoba Chamber Outstanding Long-Term Achievement Award.

We are seeking an energetic and technical individual to join our research and development team.

### Benefits

Atom-Jet recognizes that the people within our team are our most valuable asset, because of this Atom-Jet provides its employees with:

1. A comprehensive benefit package, at no cost to our employees.
2. Pension matching
3. Competitive salaries and wages
4. Work life balance
5. Regular social events

### Job Summary

This role is responsible for a **hands-on** approach to the development of new product, prototype fabrication, testing, and production releases. If you enjoy finding solutions and have mechanical ability to work hands-on to develop and improve agricultural products, this position suits you. Infield communication and troubleshooting skills with end users (farmers) and the agriculture sales team is essential.

### Duties and Responsibilities

- Strong understanding of seeding equipment
- Fabrication of jigs and fixtures
- Designing and fabricating prototype product
- In-field, 3<sup>rd</sup> party, and bench testing with documentation of data
- Troubleshooting product issues with customers
- Travel may be required

### Requirements

To be considered for this position, applicants must possess the following characteristics:

- |                   |  |
|-------------------|--|
| <b>Experience</b> | - An agricultural background with an interest in farming and farming equipment   |
|                   | - Mechanic or agricultural service technician experience would be assets   |
| <b>Skills</b>     | - Ability to weld with strong metal working skills   |
|                   | - Mechanical aptitude for understanding manufacturing processes and machinery  |
|                   | - A desire to learn CAD modelling and technical drawing  |
|                   | - Basic understanding of CNC and manual machining equipment, tool and die manufacturing, and metal forming would be assets |
| <b>Attributes</b> | - A team player who contributes and supports the Core Values of the organization   |

### How to Apply
