

CAREERS

QUALITY ASSURANCE SUPERVISOR

ATOM-JET INDUSTRIES has been in business since 1962 and is comprised of a machining and advanced manufacturing department, combined with our Agriculture department, which manufactures seeding openers and provides custom brazing solutions to our OEM clients. The Atom-Jet Group has a reputation for producing quality products and recently received the Manitoba Chamber Outstanding Long-Term Achievement Award. We are seeking a qualified professional to join our management team to lead our Quality Department.

Benefits

Atom-Jet recognizes that the people within our team are our most valuable asset, and because of this, Atom-Jet provides its employees with:

1. A comprehensive benefits package at no cost to our employees.
2. Pension matching
3. Competitive salaries and wages
4. Work-life balance
5. Regular social events

Job Summary

The individual will be responsible for all quality-related initiatives within Atom-Jet Industries. The candidate will develop, direct, and implement quality plans, policies, and procedures that align with ISO 9001-2015 while being responsible for managing those standards. The Quality Assurance Supervisor will provide professionalism, organization, and communication skills, overseeing that the quality of products is maintained to a high standard.

Job responsibilities and duties:

- First off inspections and final inspections. Experience with measuring devices (calipers/verniers micrometers) is critical.
- Report, document, and communicate non-conformances.
- Work with the entire Atom-Jet Industries team to reduce NCRs, improve quality, and achieve cost reductions.
- Ensure compliance with procedures and validate processes.
- Internal audits are scheduled and performed.
- Accurate receipt of raw material, managing quality communications with vendors.
- Report to the management team via monthly management review meetings.
- Calibrate tools and update the system
- Adhere to ISO 9001-2015 Standards

Implement quality strategies:

- Continual improvement of processes within all departments
- Improve jigs & fixtures documenting system.
- Evaluate the progress and performance of the Quality Department, taking necessary actions for improvement.

Essential knowledge, skills, and abilities:

- 5 years of experience in a leadership role within a machining/welding environment.
- Quality Management experience
- Experience designing, creating, and implementing quality practices and systems.
- Proficient using precision measuring tools (examples: calipers, micrometers, FARO, etc.)
- Strong mechanical drawing interpretation skills, geometric dimensioning, and tolerancing.
- Efficient knowledge of Microsoft Office.
- Strong analytical and problem-solving skills.
- Understanding of welding symbols/drawings
